

SELLER SOLUTIONS

Punchout Plugin

Every day, more of your customers are using e-procurement systems like Ariba, Coupa, Oracle, iValua and others to order online from suppliers – if you want them to shop and order from your e-commerce web store, it needs to be "Punchout-ready"...

Don't see your platform here? Ask us...

HOW IT WORKS

The **Vurbis PunchOut Plugin** makes your web store platform "Punchout-ready" without modifications. Installed using the web store platform's API, the **Punchout Plugin** recognizes Punchout login requests (but ignores normal web logins), and uses the Vurbis Cloud (where your customer's specific Punchout requirements, or "profile", are stored) to manage the Punchout sessions with your web store - making your customer's web and Punchout shopping experiences exactly the same!

PRICING

First Punchout	\$3700 annually
Each Additional Punchout	\$2000 annually

Implementation, operation training and support are included.

Optional transactions (Purchase Order, etc.) are \$250 annually each

KEY FEATURES

- cXML, OCI, xCBL, UBL supported
- Usage tracking and reporting
- Data mapping engine
- Custom workflow, validations and notifications

BENEFITS

- Makes your webstore Punchout-ready without modifications
- Gives you control over the customer's shopping experience
- Lowers your e-procurement order processing costs

Punchout-ready B2B Web Store

If you don't have an e-commerce web store operating today, but have customers requesting Punchout, you'll need a platform that has B2B functionality, that can be deployed fast, easy and inexpensively via the cloud - and most importantly, has "built-in" Punchout capability...

HOW IT WORKS

The **Vurbis B2B Web Store** is a cloud-based, turn-key B2B e-commerce web store platform that is "Punchout-ready" out of the box. Whether your customers are logging in from the web, or from an e-procurement system using cXML or OCI Punchout, their shopping experience is the same, and most importantly, controlled by you!

PRICING

B2B Web Store	\$10,000 annually (1st Punchout included)
Each Additional Punchout	\$2000 per year

Implementation, operation training and support are included.

Optional transactions (Purchase Order, etc.) are \$250 annually each

KEY FEATURES

- Superfast "elastic search"
- Featured products
- Category filtering
- Unlimited product attributes
- Customer groups
- Commodity Codes (UNSPSC, NAICS, etc.)
- Flexible product content and image loader
- Notification engine and chat function
- PO processing, invoice creation and delivery
- Open API

BENEFITS

- Lower selling costs
- Omnichannel buying experience for your customers
- Ability to send e-invoices
- Reduction in ordering errors and exceptions
